# Obsah

1. Relační model	2
1.1. Grafický tvar relačního datového modelu	2
1.2. Popis tabulek	3
2. Skripty	4
2.1. DDL Skript	4
2.2. DML Skript	7

## Relační model

### 1.1. Grafický tvar relačního datového modelu

Obrázek 1: Relační model

#### 1.2. Popis tabulek

- user Záznam reprezentuje jednoho uživatele s osobními informacemi, jako je uživatelské jméno,
   e-mail, křestní a příjmení, datum registrace, URL profilového obrázku a další detaily, jako je sekce "o mně".
- *channel* Záznam reprezentuje jeden kanál vlastněný uživatelem. Obsahuje název kanálu, popis a datum vytvoření, spolu s referencí na uživatele, který kanál vlastní.
- *video* Záznam reprezentuje jedno video nahrané na kanál. Obsahuje detaily, jako je název videa, popis, URL, náhledový obrázek, nastavení viditelnosti, status monetizace, datum nahrání, délka a počet zhlédnutí, spolu s referencí na kanál, ke kterému video patří.
- *playlist* Záznam reprezentuje jeden playlist vytvořený uživatelem. Obsahuje název playlistu, uživatele, který playlist vytvořil, a nastavení viditelnosti playlistu, spolu s datem vytvoření.
- *playlist\_video* Záznam reprezentuje video v playlistu. Spojuje konkrétní video s konkrétním playlistem a uchovává datum, kdy bylo video do playlistu přidáno.
- comment Záznam reprezentuje jediný komentář napsaný uživatelem k videu. Obsahuje text komentáře, datum, a referenci na uživatele, který komentář napsal, a video, ke kterému byl komentář přidán. Může mít také referenci na nadřazený komentář, pokud se jedná o odpověď.
- reaction Záznam reprezentuje reakci uživatele na cílový prvek (video, komentář nebo příspěvek).
   Obsahuje typ reakce (like, dislike, love), datum reakce, a referenci na cíl (video video\_id nebo komentář comment\_id) a uživatele, který reagoval.
- subscription Záznam reprezentuje odběr uživatele na kanál. Obsahuje referenci na odběratele (uživatele) a kanál, na který se uživatel přihlásil, spolu s preferencemi pro oznámení a datem přihlášení k odběru.
- video\_view Záznam reprezentuje zhlédnutí videa uživatelem. Uchovává délku zhlédnutého času, datum zhlédnutí a referenci na video a uživatele, který video zhlédl.
- *video\_category* Záznam reprezentuje přiřazení kategorie k videu.
- category Záznam reprezentuje jednu kategorii videí. Může mít nadřazenou kategorii (vytváří hierarchickou strukturu) a obsahuje název kategorie.
- advertisement Záznam reprezentuje jednu reklamu s jejím obsahem, cílovou skupinou, URL obrázku, odkazem na CTA (Call to Action), stavem (aktivní, neaktivní, vypršelo), mírou prokliku, příjmem a rozpočtem.
- video\_advertisement Záznam reprezentuje umístění reklamy ve videu. Spojuje video s
  reklamou, specifikuje typ reklamy (pre-roll, mid-roll, post-roll nebo banner) a čas začátku a konce
  reklamy.
- ad\_impression Záznam reprezentuje zobrazení reklamy uživatelem ve videu. Obsahuje reklamu, uživatele, který reklamu viděl, video, ve kterém se reklama objevila, datum a čas zobrazení, zařízení, které uživatel použil, a informaci o tom, zda byla reklama zakliknuta.

# Skripty
